1. Introduction

The collected data, with the exception of the data from the EWAS and GWAS can be found on this Generation R data wiki (only accessible within the Erasmus MC network, authorization obtained from datamanagement; datamanagementGenR@erasmusmc.nl).

All questionnaires and forms can be found on the Generation R wiki; <http://survey.erasmusmc.nl/wiki/generationr-intra/doku.php>, along with the data dictionary when available.

The datasets (SPSS format) are categorized in the different periods and the type of data collection. In this data dictionary the available variables collected in the fetal period are described. This includes the variable label and value labels of the specific variable.
